### KeyLogic Receives New Contract, Continues Award-Winning Work with EPA OCFO

KeyLogic will continue its award-winning budget systems support for the Environmental Protection Agency's Office of the Chief Financial Officer (EPA's OCFO). The five-year contract, valued at \$15.5 million, makes the EPA KeyLogic's largest federal government customer.

*Surrounded by the BAS team, Project Manager Jeff Johnston "bangs the gong" (loudly) in celebration of their exciting contract award*

KeyLogic staff have been supporting budget and performance integration for the EPA's headquarters and ten regional offices for nearly ten years. Our team developed and currently maintains the EPA OCFO's Budget Automation System (BAS), which assists the agency in complying with the Government Performance and Results Act (GPRA).

### KeyLogic Teaming with Deloitte on Migrant Student Information Exchange

As a subcontractor to Deloitte Consulting, LLP, KeyLogic is providing project management services in support of the Department of Education's (ED's) Migrant Student Information Exchange (MSIX) contract. The contract, valued at \$14 million, is part of ED's Migrant Student Records Exchange Initiative, which was created to assist States in developing effective methods for the electronic transfer of student records and determining the number of migratory children within their school systems. The goal is to reduce the educational disruption, ensure the appropriate enrollment,

## KeyLogic Awarded Reporting Services Contract by EPA's Office of Water

KeyLogic has been awarded a new contract by the EPA to provide operations and maintenance support for the agency's Office of Ground Water and Drinking Water (OGWDW). KeyLogic will continue its longstanding relationship with the agency by supporting the Office's Safe Drinking Water Information System – Federal (SDWIS/FED) Reporting Services, which utilize Microsoft SQL Server, as well as developing, deploying and maintaining new and existing reports, many of which are captured in the Lotus Notes E-mail environment. The initial contract is for one year, but it includes two options that would continue work through 2010.

KeyLogic will support the SDWIS/FED system by capturing and documenting requirements, and designing, developing, deploying and maintaining up to six new reports for the Reporting Services and Lotus Notes E-mail environments. In addition, the team will modify and manage existing web-based reports, test and deploy software modules, update Microsoft SQL Server and SRS applications, and provide configuration and reports management support to EPA personnel. Finally, KeyLogic will develop, maintain and make available to EPA staff an online project Event Tracking System (ETS), including a program for Software Incident Reports (SIRs), to track, monitor and schedule resolutions for potential problems or issues with the Reporting Services software, documentation and reports.

### EPA OCFO BAS *(continued from page 1)*

BAS helped enable the EPA to receive numerous recognitions for financial performance. The EPA was one of only nine agencies to receive a green light ranking for financial performance on their first quarter 2007 President's Management Agenda (PMA) Scorecard - a ranking they attained and have maintained since their second quarter 2003 Scorecard.

BAS also helped the EPA to qualify as a finalist for the 2002 Presidential Quality Award and to win the 2003 Presidential Quality Award for Management Excellence, in the area of Improved Financial Performance. As a direct result of KeyLogic's BAS support, EPA was honored with a 2004 GCN magazine Agency Achievement Award for using innovative technologies to create superior results for their agency and its constituents.

## Program Management Award Received from Department of Homeland Security

KeyLogic has received a new subcontract award to provide Program Management services in support of the U.S. Department of Homeland Security's (DHS') Strategic Sourcing Initiative, an effort focused on reducing procurement costs, maximizing performance and efficiency, and improving competition through strategic sourcing. The award, a five-year blanket purchase agreement with an estimated potential value of over \$500 million, supplies all components of the agency with professional and program management support services geared at optimizing performance and meeting socioeconomic goals.

The team, led by ICF International, includes KeyLogic, Robbins-Gioia, AOC Applied Technologies, ICOR Partners, HW&W and Mason Harriman Group.

### KeyLogic Participates in DHS EAGLE Program

KeyLogic, as a subcontractor to SAIC, has received an indefinite-delivery/indefinite-quantity (ID/IQ) contract to provide IT support to the DHS' Enterprise Acquisition Gateway for Leading Edge Solutions program, also known as EAGLE. The contract has a five-year period of performance with two one-year options, and was created by DHS' Information Technology Acquisition Center (ITAC) to establish a suite of ID/IQ contracts for IT support services that will enable DHS business and program units to accomplish their critical homeland security mission objectives.

25 highly experienced companies were chosen to participate in the EAGLE program, but the SAIC team was one of only four contractors to receive awards in four of the five functional categories. The team will provide services to DHS in the following functional categories:

- FC 1 - Infrastructure Engineering, Design, Development, Implementation and Integration
- FC 2 - Operations and Maintenance (O&M)
- FC 4 - Software Development
- FC 5 - Management Support Services

In addition, KeyLogic is serving as a subcontractor on the BearingPoint EAGLE team. Under this contract, KeyLogic will be providing Independent Verification and Validation (IV&V) services as outlined in the third functional category of the EAGLE contract.

- FC 3 - Independent Test, Validation, Verification and Evaluation

### KeyLogic to Continue IRS Support with EDS

KeyLogic Systems, as part of a team led by EDS, is supporting the Internal Revenue Service's (IRS's) Offshore Credit Card Project (OCCP) under a contract awarded by the agency's Office of Information Technology through the Total Information Processing Support Services (TIPSS-3) contract.

KeyLogic has been the sole contractor providing database development, implementation and maintenance support for the OCCP web-based data mining application since its inception in 2003. The application is developed in ASP.NET and C#, and contains scripts that perform complicated queries of the information contained in the database. The data compiled by these queries aids the IRS in recognizing credit card data spending patterns and identifying viable candidates for case development and subsequent investigations. These investigations identify fraudulent activities and persons and develop supplemental background information that can be used to support criminal or civil actions. The goal is to identify more than 4,000 taxpayers for case building through the OCCP.

KeyLogic began supporting the IRS in 2003 during a pilot project to analyze credit card account numbers provided by the agency. Our data mining grid assessment targeted suspicious actions and spending patterns, resulting in the identification of more than 20,000 leads and subsequent investigations that enabled the IRS to collect more than \$75 million in monies owed.

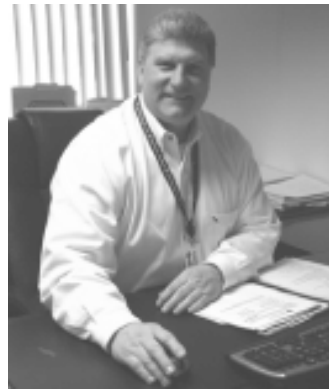

### ED MSIX Contract Award *(continued from page 1)*

placement and accrual of credits, and monitor the health and development of migrant children, or those who have changed schools during or between regular years, through improved data collection, accuracy and timeliness of exchanged information.

KeyLogic personnel have assisted the Deloitte MSIX project management in reviewing the project's Work Breakdown Structure (WBS), schedule and resources to facilitate reporting Earned Value (EV) metrics on a monthly basis to the ED's project manager and senior management. Having set up the appropriate tools and reporting formats, KeyLogic personnel now review the data and generate the required EV data, metrics and analysis as part of the project's monthly status report.

As part of the President's Management Agenda, the Office of Management and Budget (OMB) has mandated that certain projects

### Chief Financial Officer Bissett Joins Management Team

*Mr. Ken Bissett, KeyLogic's  
First Chief Financial Officer  
(CFO)*

KeyLogic has garnered eight consecutive years of growth since its inception, gaining it recognition from *Inc.* and *Washington Technology* magazines and the Small Business Administration (SBA) as one of the nation's fastest growing businesses. With this, KeyLogic has welcomed Ken Bissett as the company's first CFO, responsible for developing strategies to maintain the company's strong financial growth, managing corporate processes and fiscal systems, and overseeing daily business operations.

With more than 25 years of experience performing and managing all aspects of finance, accounting, planning, contracts, human resources, administration and general operations, Mr. Bissett brings a wealth of expertise to aid the Management Team in optimizing KeyLogic's future within the IT marketplace. Mr. Bissett has served as a CFO since 1995 for companies including LJT & Associates, SIMmersion LLC and TSI TelSys, supporting each during periods of rapid growth and development. KeyLogic recruited Mr. Bissett to provide guidance to the company as it continues its expansion within the federal government as well as in the commercial sector.

Mr. Bissett earned his Bachelor of Science degree in Accounting from Fairmont State College and grew up just minutes from KeyLogic's corporate headquarters in Morgantown. Mr. Bissett and his wife Jackie returned to the area to live with their children, Scott, who recently received his degree in Industrial and Systems Engineering from Virginia Tech, and Stephanie, a senior Lacrosse player at Syracuse University.

report their progress on at least a monthly basis using the techniques of Earned Value Management (EVM). EVM is a well known project management tool that allows for regular and quantitative assessment of project performance. EV metrics can provide a calculation in common terms for both schedule and cost performance at either a task or summary level in hopes of pinpointing trends or problem areas early enough to allow management to administer corrective actions and keep the project on track.

## KeyLogic to Support EPA Financial System Modernization Project

On February 12, 2007, CGI Federal (CGI) and their team, including KeyLogic, won a contract to support the Environmental Protection Agency's (EPA's) Financial System Modernization Project (FSMP). Under the ten year contract, valued at \$84 million, the team will work to modernize the agency's financial system and migrate its IT hosting and application management activities to CGI under the Financial Management Line of Business (FMLoB) initiative. This award culminates the first large-scale financial system procurement conducted by a CFO Act federal agency under the FMLoB. In hosting the solution at their southwest U.S. data center, CGI serves as a commercial shared service provider (SSP) and a private Center of Excellence.

KeyLogic, serving as one of several subcontractors, was chosen for this effort because of our extensive EPA budget expertise, gained from nearly ten years of integrating budget and performance data for the EPA's headquarters and ten regional offices. Our team developed the award-winning BAS for the OCFO. BAS automates the agency's budget formulation process, taking it from a distributed process involving spreadsheets and local databases to a centralized real-time application used nationwide by all EPA offices. With KeyLogic's support, the EPA has realized substantial improvements in data quality and overall timeliness, established a real-time reporting system, and automated nightly reports comparing budget data with actual spending. BAS allows EPA personnel to complete budgeting tasks more efficiently and focus their efforts on their ultimate goal – a cleaner environment.

Mr. Ben Rowland

### Rowland Brings Enthusiasm & Experience to Support Management & Business Development Teams

As KeyLogic's new Director of Business Development, David Benson Rowland, "Ben," will lead the company's proposal development, sales and marketing efforts as it grows within the federal and commercial marketplaces.

Mr. Rowland has more than 20 years of proven expertise in business development and marketing, proposal management and services, and effective project delivery. He brings his unique background, problem solving skills and enthusiasm to bear on the most difficult and challenging implementations.

## Quick Hits

### KeyLogic to Support ENCORE II Contract

As a subcontractor to SAIC, KeyLogic will provide support under the Defense Information Systems Agency's (DISA's) ENCORE II support contract. ENCORE II, an ID/IQ multiple award contract, is intended to support users in the defense agencies and military services as they transition from legacy systems to Net-Centric Enterprise Services (NCES). Contractors, operating over a five year base period and five one-year option periods, will provide up to \$12.225 billion worth of high level enterprise IT policy, integration management, communications engineering and asset management services to customers within and outside the continental United States.

### KeyLogic Participating in Department of Defense's Mentor-Protégé Program

KeyLogic is participating, along with Northrop Grumman Corporation (NGC), in the Department of Defense (DoD) Mentor Protégé Program (MPP), under sponsorship of DISA. DISA is KeyLogic's largest customer and a market where we anticipate major growth over the next several years. Our partnership with NGC will greatly improve our capabilities to provide DISA with systems engineering support and will improve our internal efficiency. The capstone effort of our agreement will be KeyLogic's external certification at CMMI level 3, which will be achieved during the MPP contract period.

Other business areas targeted for improvements include proposal management, HR, customer relationship management, program and project management, marketing, contracts, software development and Independent Verification and Validation (IV&V). Watch for more MPP details in upcoming editions of KeyLogic News!

### ***KeyLogic Begins Fourth Year of Balanced Scorecard Planning***

In 2004, KeyLogic employees adopted the Balanced Scorecard (BSC) to communicate and align corporate and departmental goals and connect individual performance plans to corporate strategies. The Balanced Scorecard strategic model provides a basis for charting individual goals and conducting performance reviews. This practice will continue in 2007, and for many years to come.

The BSC focuses on four major corporate strategic perspectives – Financial, Customer, Internal Processes, and Learning and Growth. This actionable plan enables companies and employees to annually clarify a vision and strategy, define critical success indicators and set measurable goals. Once established, these strategies and goals can then be translated into reasonable and organized actions for accomplishment.

KeyLogic embraced the Balanced Scorecard Strategic Approach because it supports the company's strong commitment to quality. KeyLogic feels so strongly about the value of the BSC that the process was implemented throughout all levels within the company. By using the BSC as a planning template, KeyLogic sets challenging strategic goals such as strong financial growth, high levels of customer satisfaction, efficient and effective processes, and an engaged, experienced workforce. Each perspective's targets support the company's mission, vision and values. KeyLogic can focus, align and measure goals, set priorities, allocate funding, and lead employees to meet or exceed customer expectations, as well as departmental and personal objectives.

### ***KeyLogic Receives GSA FABS Contract***

In February, KeyLogic was awarded a Financial and Business Solutions (FABS) schedule contract by the U.S. General Services Administration (GSA). Under the contract, which has a base period of five years and three option periods that bring the total contract term to 20 years, KeyLogic will support the federal financial community with a full range of financial management services. Specifically, KeyLogic will provide:

- SIN 520-12: Budgeting
- SIN 520-13: Complementary Financial Management Services
- SIN 520-14: Audit and Financial Training Services

KeyLogic also holds IT Schedule 70, MOBIS and Millenia Lite schedule contracts from GSA.

### ***DISA Partnership Conferences (continued from page 1)***

This spring, as part of their Mentor-Protégé partnership with Northrop Grumman and their long-standing relationship with DISA, KeyLogic attended two Partnership Conferences geared at bringing the agency, its contractors and its customers together to discuss the critical issues facing our nation and to further the relationships among the groups.

The first, the Mentor-Protégé (MP) Conference, was held in March in Temecula, CA with the theme "Building Strategic Partnerships for National Defense." This year's conference set a record with more than 550 participants, with attendees including DoD Directors of Services, Military Services and other Defense Agency Program Managers, as well as large (Mentors) and small (Protégés) defense contractors. Highlights included a Keynote Address from The Honorable Dr. James I. Finley, Deputy Under Secretary of Defense for Acquisition and Technology, the prestigious Nunn-Perry awards (presented to Mentor-Protégé teams), and more than 50 speakers discussing topics such as government regulatory changes, innovative partnering, and the importance of technology to small business growth and warfighter requirements.

The Customer Partnership Conference and Technology Exposition, held in May at the Opryland Resort in Nashville, TN and sponsored by the Armed Forces Communications Electronics Association (AFCEA), surrounded the theme "Connected at the Speed of Innovation." The annual event offers information sessions that provide a forum for questions, concerns and problem resolution, with this year's topics including operational superiority, innovative technologies and initiatives, spectrum issues, planning and management, and net-centricity. The Plenary Session included a briefing from Lieutenant General Charles E. Croom, Jr., USAF, Director of DISA (pictured at KeyLogic's booth on page 1) that focused on information sharing, operational effectiveness and meeting DISA's important mission – delivering capabilities to our nation's warfighters.

KeyLogic is proud to provide support to DISA's mission and our nation's defense and is excited to further develop our relationships with both DISA and Northrop Grumman as a participant in the DoD Mentor-Protégé program.

### ***KeyLogic Receives Option Renewal for DISA GEMS ACTD Support***

KeyLogic has received a second option renewal to continue its Program Management support for DISA's Command and Control (C2) Advanced Concept Technology Demonstration (ACTD) program, managed by the agency's Global Information Grid (GIG) Engineering Center (GE3) and the Department of Defense's (DoD's) Net-Enabled Command Capability (NECC) program.

For this contract, KeyLogic develops required documentation, including Implementation, Management, Transition and Strategic Plans and Clinger-Cohen documentation, and facilitates the staffing, consolidating and rationalizing of comments and issues. Our team also researches, analyzes, recommends and documents program issues, external audits, federal standards, operational policies and doctrines, technical reports and guidelines, and acquisition best practices to support DISA in exercise planning and conduct, investment planning, return on investment, earned value management and schedule dependencies.

### ***KeyLogic Implements KeyStone Referral Program, Taleo Tracking System***

KeyLogic's outstanding personnel have helped the company grow by providing exceptional service to our customers – they are the “KeyStone” to our continued success. Acknowledging this employee commitment to excellence, KeyLogic introduced the *KeyStone Employee Referral Program (ERP)*. The ERP encourages employees to submit resumes from friends, neighbors and colleagues to the KeyLogic Recruiting Department. When employment opportunities arise, recruiters review these submitted resumes, and if a hire is made, the submitting employee is rewarded with a monetary bonus.

To better maintain, track and share these records, the department implemented *Taleo's Applicant Tracking System (www.taleo.com)*. Among many other great features, this system allows for easy records management and searching, helps to maintain the company's online career site and application submissions, and is accessible online from anywhere and at any time. This “Best Practices” feature is particularly essential for our busy project managers and senior management who travel frequently.

“Great people know other great people,” said Alice Oates, KeyLogic's Director of Human Resources. “KeyLogic's employees have helped the company achieve eight consecutive years of growth and a solid reputation for customer service. We know they will refer other experienced, customer focused employees to join our team.”

### ***KeyLogic Sponsors OSDDBU Procurement Conference***

In April, KeyLogic was a proud participant and general sponsor at the Office of Small and Disadvantaged Business Utilization's (OSDBU's) Procurement Conference, organized by Federal Business Council (FBC) and held at the Show Place Arena in Upper Marlboro, MD. This is the third year KeyLogic has served as a sponsor for the conference, which focuses on small businesses and their development within the federal marketplace.

The annual event, established in 1990, offers a one day technology exposition as well as networking and educational opportunities and Matchmaking Sessions with buyers and other representatives from federal, state and local agencies and large prime contractors.

### ***Second Book Drive Held to Support Troops***

Following the success of the 2005 DISA / KeyLogic book drive, KeyLogic held a second book drive earlier this year to support our troops serving overseas. Once again, the effort was led by KeyLogic's Betty Carey, who coordinated company and agency efforts to send numerous boxes of new and used books, magazines, journals, DVDs and CDs to our Multi National Forces (MNF) remote sites in Iraq. The donated items stock troop recreation rooms built for relaxation and enjoyment during downtime from their active service duties and often help those spending long amounts of time overseas keep up on regional news, popular culture and even gift giving.

Thanks again to everyone who participated in this year's event! Watch for more drives and other community service projects in upcoming issues of KeyLogic News and on our website [www.keylogic.com](http://www.keylogic.com).

### ***Rowland (continued from page 4)***

Mr. Rowland has consulted with dozens of Fortune 500 companies, worldwide organizations, government agencies and large federal contractors on more than 300 proposal development efforts and a variety of important projects resulting from winning numerous contracts. He has subject matter expertise in many information technology areas covering user interface design, advanced communications, process development, collaborative systems, and both front- and back-end architecture on enterprise solutions. He is instrumental in creating partnership and synergy on projects involving varied companies and organizations including Bearing Point, Northrup Grumman, The World Bank, Raytheon, UNISYS, and Skyline Ultd., Inc.

## New Hires

**Jose Rivera** (8/5/06) serves as a Sr. Lead Analyst for KeyLogic's commercial VISA project and provides additional support to the company's IRS OCCP database application. A member of the U.S. Army Reserves, he has 23 years of communications experience, a B.S. in Mathematics, and was previously employed by SAIC. He met and married his wife Maria in Worcester, MA, and together they have one son, two daughters, and five grandchildren. When he has time, Jose enjoys reading and watching good drama movies.

**Christine ("Chris") Rueter** (8/28/06) joined KeyLogic as a Senior Business Analyst, and she currently supports the eFacts project for EPA's Office of Superfund Remediation and Technology Innovation. Chris graduated with a B.A. in English and Biology from Valparaiso University, and received her M.A. in creative writing and literature from Kansas State University in 1995. She and her husband Kai moved from Kansas to the D.C. area in 2002 when he accepted an assistant professorship at University of Delaware. Chris enjoys spending time with their daughter Grace, singing in a choir, and searching for adventure or exotic eats in Washington, Baltimore, and beyond. And, in addition to working part-time for KeyLogic, she is teaching English composition classes at the Community College of Baltimore County in Catonsville.

**Stan Warren** (09/05/06) is a Proposal Coordinator for KeyLogic's Business Development team. A member of the DC Metro area office, Stan provides proposal and business development support to KeyLogic's Strategic Business Units (SBUs), with a special focus on the Knowledge Management (KM) SBU. Additionally, Stan serves the U.S. Army Reserves Military Police Corps., located at Ft. Meade, Maryland. He earned his B.A. in English from Gordon College in 1999, and was previously employed as the Senior Technical Writer at Devnix Data Management in Baltimore.

**Kim Hunter** (9/5/06) is a Sr. Project Manager supporting KeyLogic's efforts at the Department of Labor and the Department of Interior in Washington, DC. A retired US Marine, Kim is a graduate of George Mason University, where she earned her M.S. in Technology Management in 2005. Kim is a Project Management Professional (PMP) and is Chief Information Officer University certified. Kim spent 20 years on active duty in the Marine Corps, as both an enlisted Marine and as a commissioned officer. She served two tours at the Pentagon, working in the Office of the Secretary of the Navy and then for the Commandant of the Marine Corps. Her last tour on active duty was at a training command where she was the main author for the Marine Air-Ground Task Force G-1 (Administration and Command) Operations pamphlet, which is used today as an authoritative guide for deploying G-1s. Immediately after her retirement, she was a senior project manager for Quantico Network Operations Center (NOC) in support of the Navy-Marine Corps Internet Program. She and her husband Ken, a senior systems engineer for test and integration for Progeny Systems, raise and train dressage horses on their small farm near Manassas, Virginia. They have one daughter, Brittney, 22. In her free time, Kim enjoys running, marksmanship, gardening and traveling.

**Claudio Sanchez** (9/15/06) is supporting KeyLogic's KM SBU by serving as a Sr. Applications Developer for its commercial VISA project. He earned his Vocational degree in Computer Systems Development from Salesian Technical Institute, and is currently pursuing his B.S. in Computer Science from the University of Maryland University College. Prior to being employed by KeyLogic, he worked for Electronic Warfare Associates, Inc., Megsoft Consulting, Reserve Bank of the Dominican Republic and the U.S. Air Force. Claudio enjoys traveling and learning about new cultures. In addition, he has also discovered a new preference for the West Virginia University Mountaineers.

**Katharine Belcher** (1/2/07) is the new Executive Assistant to KeyLogic's President and CEO Jon Hammock. Katharine provides administrative support to Hammock and the Management Team, as well as the rest of KeyLogic, from the company's Headquarters in Morgantown, also her hometown. Prior to joining KeyLogic, Katharine earned her Associate's Degree in Business Management from West Virginia Junior College and worked for West Virginia University Hospitals (WVUH) and University Health Associates (UHA) for more than 18 years, serving as a secretary, scheduler, residency coordinator, and, most recently, Sr. Administrative Assistant to the Chairman of WVUH's Department of Surgery. Katharine and her husband Scott have a daughter, Elise, who was married this summer, as well as two dogs and five cats. She is an avid WVU Mountaineers and Pittsburgh Steelers fan, loves penguins and enjoys traveling, being outdoors, reading and watching television.

**Brian Fleak** (4/9/07) serves as KeyLogic's Accountant III, providing timekeeping, expense, payroll and other administrative support to the company's Finance department. Previously, Brian was employed by the Institute for Scientific Research (ISR), Inc. and the West Virginia High Tech Consortium (WVHTC) Foundation, and he earned his B.S. in Business Administration as an Accounting and Finance double major. Brian's evenings and weekends are spent enjoying movies and music, working out, hiking and biking.

*In addition, two former KeyLogic employees rejoined our team this year. KeyLogic retiree **Carl Butler** returned to work as a Sr. EVM Analyst, supporting our Department of Education MSIX project, and **Krista Arnold** is back with the KeyLogic's Business Development department, serving as a part-time Proposal Manager. Welcome back - we missed you both!*

*Welcome to  
KeyLogic!*

## *KeyLogic Celebrates 8th Anniversary, Rapid Growth*

In April, KeyLogic celebrated its eighth anniversary by promoting health, wellness and giving back to our country and communities. In addition to a second KeyLogic / DISA book drive for the troops (see page 6 for more details), employees participated in an EPA Earth Day e-cycling event, regional celebration picnics, and were challenged by the company to a friendly step competition using pedometers received as gifts. Participating employees were assigned to one of four teams and logged their steps on their team websites over a six week period.

"The friendly competition with co-workers is fun and I have been much more conscious of my activity level throughout the day," said Krista Arnold, Proposal Manager and proud member of the "Catch Us If You Can!" team.

KeyLogic was founded in 1999 and has since achieved eight consecutive years of growth. A prime on nearly 75% of its contracts, KeyLogic attributes its success to its enthusiastic and experienced staff of professionals dedicated to innovative thought, proactive solutions and top-notch customer service.

*Employees in the DC Metro Area celebrated with an afternoon of fishing and remote control boats in the lake behind the office.*

*Employees were eager to participate in another book drive for our nation's troops - this is just one of the locations where books were sorted, packed and shipped.*
